

# APSA 2023 19<sup>TH</sup> BIENNIAL CONFERENCE

Australasian Pig Science  
Association (Inc)

Sofitel, Brisbane, Australia

13<sup>th</sup> - 16<sup>th</sup> November 2023

## Biosecurity Information for International Delegates

APSA welcomes delegates from all countries. In light of the African Swine Fever (ASF) risk to the Australian pork industry, we encourage anyone travelling to Australia to attend the 19<sup>th</sup> Biennial APSA Conference to observe the Australian Government's information on keeping ASF out of Australia.

<http://www.agriculture.gov.au/pests-diseases-weeds/animal/asf>

*"African swine fever (ASF) is a contagious viral disease of domestic and wild pigs... ASF has never occurred in Australia. Its changing distribution means it's a significant biosecurity threat to our country. An outbreak would be devastating for our pig production and health. It would also damage our trade and the economy." Department of Agriculture, Fisheries and Forestry*

*"You must declare on your Incoming Passenger Card any food and animal products, and other risk items. This includes footwear, clothes and equipment that has been in contact with animals or worn in a rural area." Department of Agriculture, Fisheries and Forestry*
