

Dr Darryl D'Souza

Food safety risks and consequences for the pork industry

Dr Darryl D'Souza is the Executive General Manager, Technical Services for the SunPork Group, Australia. The Technical Services business unit incorporate genetics (PIC Australia and New Zealand), research and development, technical training (pig production and meat processing), benchmarking and decision support, sustainability, and quality systems management services for the SunPork Group. Prior to SunPork, Darryl was the General Manager, Research & Innovation with Australian Pork Limited, the producer owned organisation supporting and promoting the Australian Pork industry, and the Program Leader with the Cooperative Research Centre for High Integrity Pork. Darryl has held regional technical management positions with Alltech Biotechnology P/L, quality systems and technical manager for the Craig Mostyn Group (Pork Division) and research scientist positions at the Western Australian Department of Agriculture and Food and the Victorian Institute of Animal Science. Darryl completed his PhD at the University of Melbourne in 1998 and is a Meat Scientist with over 25 years' experience.
